

Kia Niro

HEV, PHEV, EV

Movement that inspires

NOVEMBER 2024

Kia. The new word for electric

We are at the dawn of an exciting new era in motoring.

The electric revolution is here, bringing with it a quantum leap in the way cars are built, powered and driven. At Kia, our designers and engineers are already moving ahead, creating a new class of advanced electric vehicles to inspire you today and into the future.

Overseas model shown.

Not all features are available on all models.

Niro by Kia. Take the next step

Striking, capable and impressively equipped, the all new Niro represents the next step in the evolution of Kia's brilliant compact SUV.

From class leading interior space and the latest technology, to Niro's legendary practicality, every aspect has been reconsidered and redesigned to make life a little easier.

At Kia, we believe that adopting new technology should feel completely natural and seamless. That's why, with the choice of three advanced hybrid, PHEV and electric powertrains, Niro makes stepping into the next era of motoring a very easy decision indeed.

Not all features are available on all models.

Overseas model shown.

The next step in style

Combining cutting-edge design with materials inspired by the natural world, the all new Niro is a fluent expression of Kia's global design language.

Longer and wider, it has been redesigned from the ground up, with strong lines and unique details, including sculptural headlights and tail lights flowing into a signature rear C-pillar that highlights the profile.

As with every vehicle Kia designs, advanced engineering drives Niro's stunning looks. The arresting profile is shaped by advanced aerodynamics that improve energy efficiency, while the C-pillar conceals an extra air intake that reduces static pressure, allowing for exceptionally quiet and efficient highway cruising.

Inside, the new Niro welcomes you with class leading amounts of interior space and legroom. There's more than enough space for everything from school runs, to outdoor adventures.

Not all features are available on all models.

Overseas model shown.

E. To the power of three

The new Kia Niro gives you the choice of three advanced engines, ranging from two versatile and economical petrol / electric hybrids to a fully electric powertrain offering outstanding range and performance. Whichever you choose, you'll be driving into the future with confidence.

Not all features are available on all models.

Hybrid (HEV)

The Niro Hybrid offers the perfect balance of performance and economy via a powerful 32 kW electric motor paired with a responsive 1.6 litre petrol engine. Niro's intelligent hybrid drive system switches between electric, petrol and a combination of both to deliver responsive power when you need it and reduced emissions and fuel consumption around town. The battery recharges itself on the move or under regenerative braking, ensuring that an electric boost is always there when you need it.

Plug-in Hybrid (PHEV)

A useful electric range, significantly lower emissions and fewer visits to the petrol pump are just some of the benefits you enjoy with Niro PHEV. Charge your Niro at home or at a convenient fast-charge station to enjoy up to 65 km of fully electric range (WLTP) - enough for a day's city commute or school drop-offs. When it's time to hit the highway, the 62 kW electric motor works in tandem with the 1.6 litre petrol engine to deliver fuel consumption as low as 0.7 litres per 100 km (WLTP).

Pure Electric (EV)

If you're ready to go fully electric, the Niro EV is ready to exceed your expectations. With an all-electric range of up to 460 km (WLTP), the Niro EV will whisk you from Auckland to New Plymouth or from Queenstown to Christchurch on a single charge. Kia's Fast Charging system takes as little as 65 minutes to go from 10 to 80% charge (50 kW charger).

Electric power and acceleration are instantaneous, while 3-step regenerative braking keeps you in full control. Notice that extra leg room? The battery sits below the floor, creating even more space for rear-seat passengers and cargo.

Not all features are available on all models.

Step into your comfort zone

Inside, the new Niro is a true step ahead in comfort and technology. Close the door with a reassuringly solid thud, settle into the new ergonomic seats and relax in a safe, comfortable cocoon. Above you, the wide tilt-sliding sunroof fills the cabin with soft, natural light, while protecting you from UV rays.

Before you is a panoramic HD display, combining driver information with the infotainment and navigation systems. As functional as it is beautiful, the display keeps you in total control with crisp graphics and intuitive touch commands at your fingertips. It's supported by an additional Head Up Display, that projects essential information on the windshield, so you can keep tabs on everything and your focus on the road ahead.

Offering new levels of ergonomics and comfort, Niro's new, slimline seat design creates more space for rear passengers whilst reducing driver fatigue on long journeys. As a thoughtful touch, the backs of the front headrests include built-in, shape-preserving coat hangers, ensuring that both you and your jacket arrive in top shape.

Thoughtful design details are everywhere, like the infotainment and climate control strip that switches intuitively between functions, keeping the dashboard clean and uncluttered. As you'd expect from an advanced electric vehicle, there's plenty of power to charge all of your devices, with a wireless charging pad for front seat passengers and USB ports on both seat backs.

Not all features are available on all models.

Not all features are available on all models.

Technology meets sustainability

Kia's driving philosophy is inspiring mobility. We believe that our vehicles should move life forward, not just for the people who use them, but also for the world they travel through. So when you drive the new Niro, you're surrounded by innovations, designed to make life a little better in every way.

Take the Virtual Valet Parking Assist system, for example, an ingenious feature allows you to remotely enter and exit parking spaces from outside the vehicle. Just press the key fob and a suite of advanced sensors takes control, precisely guiding your Niro into even the tightest of spaces.

Not all features are available on all models.

The same innovative thinking powers the hands-free smart tailgate, which can be set to open to a desired height, avoiding ceilings or other obstacles. When you have your hands full, simply stand behind your parked Niro for three seconds with the key close by. The tailgate will sense your presence and open automatically.

The new Niro showcases Kia's focus on using sustainable, recyclable and non-toxic materials. The interior head liner is now made using 56% recycled plastic, while the cargo screen is 70% of the same. The seats are upholstered in vegan bio leather, a durable yet luxuriously soft material made from eucalyptus leaves. Kia uses only non-toxic BTX-free paints.

Not all features are available on all models.

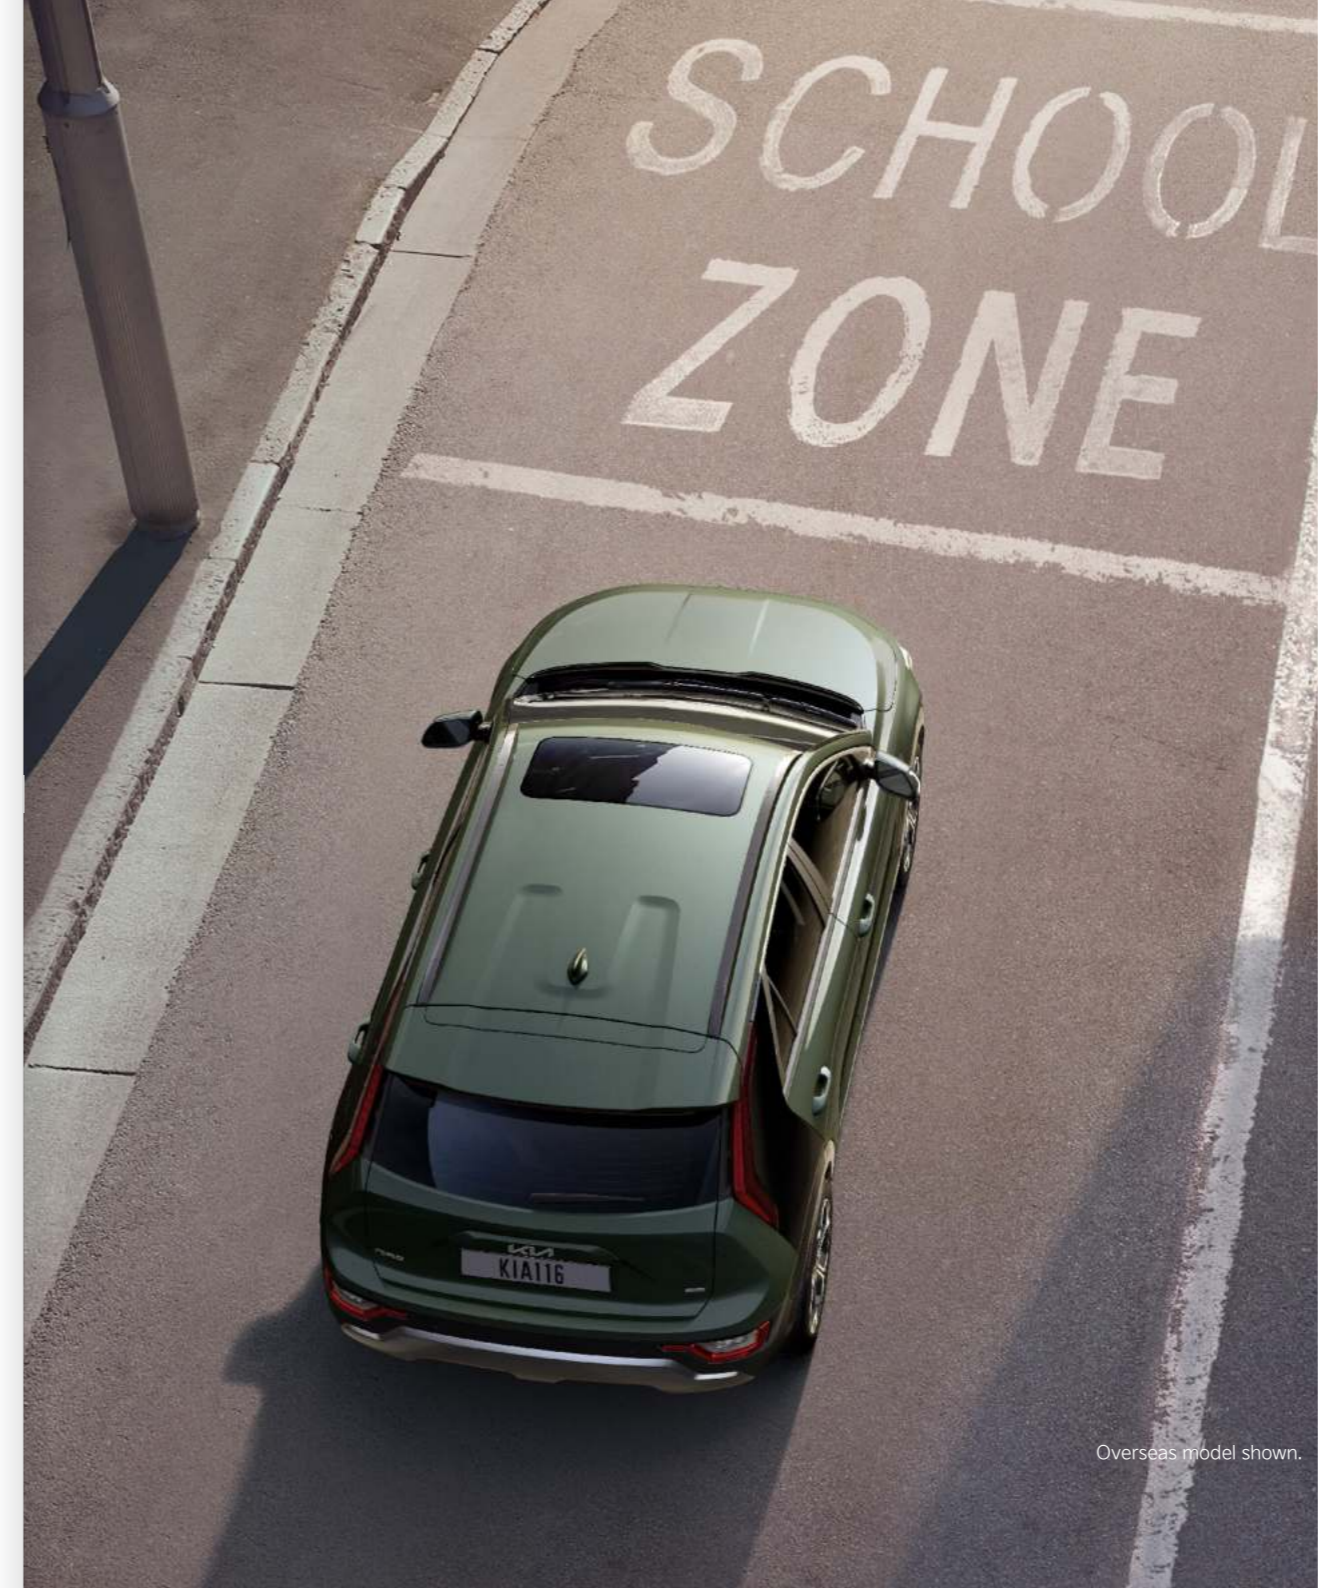

The next level of safety

There's a certain confidence that comes from knowing you're in an exceptionally safe car. That's the feeling you have driving the Kia Niro. As you would expect, the new Niro provides the highest levels of protection with a rigid passenger cell, crumple zones, side impact protection and seven airbags, including a new front centre-side airbag. But that's just the start of its many advanced safety features.

Kia's DriveWise technology protects you with no less than 14 collision avoidance and safety assist systems; scanning, sensing and stepping in to assist when needed.

The Advanced Driver Assistance System (ADAS) scans the road ahead to warn you of a vehicle, pedestrian or cyclist and will apply the brake to avoid a collision. The system will also brake if the right turn signal is activated and there is the risk of a collision with an oncoming vehicle while turning at an intersection.

Not all features are available on all models.

When you signal to change lanes or pull out of a parking spot, Blind-Spot Collision-Avoidance Assist (BCA) warns you of the presence of a rear side vehicle.

Young family members are further protected by up to five anchorage points for child restraints, while Rear Occupant Alert (ROA) makes doubly sure that the rear seats are unoccupied by warning you of any rear occupants before you leave your parked Niro.

Not all features are available on all models.

∞ Apple CarPlay: Requires an iPhone 5 or later and it is recommended to always update your iPhone to the latest iOS release. Use the Apple Lightning cable provided with your phone, or Apple certified Lightning cable.

† Android Auto: Requires an Android phone with Android 5.0 Lollipop or higher. It is recommended to always update your phone to the latest OS release. Use the USB cable provided with your phone.

° Not all mobile phones will be compatible with the vehicle's Bluetooth® and multimedia system Not all mobile phones will be compatible with the vehicle's Bluetooth® and multimedia system

Kia Motors cannot guarantee continued compatibility.

Eco-Conscious

A step toward a better future.

Hybrid and electric vehicles like the new Kia Niro point the way toward a clean, emission free future. Kia is committed to pioneering environmentally friendly technologies and our Environmental Research Centre in Seoul spearheads our drive for the production of clean hybrid and fuel-cell vehicles.

Our vehicles are designed to minimise their environmental impact throughout their entire lifecycle, based on strict Design for Recycling (DfR) guidelines. When your Kia reaches the end of its life, virtually all of its components can be recycled, or disposed of safely and sustainably.

We only have one planet. Our goal at Kia is to help you enjoy it and preserve it.

Niro EV

Factory
Warranty
Quality Redefined

Niro HEV & PHEV

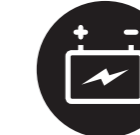

Factory
Warranty
Quality Redefined

All new Kia Passenger Vehicles come with an impressive 5 or 7-Year/150,000 km (whichever comes first) Warranty Programme covering against manufacturing or assembly defects. This warranty programme is transferable between owners and emphasises our commitment to our customers.

5 Year Roadside
Assist

A Roadside Assistance Programme for the duration of the Warranty Period is also offered on every new Kia at no cost. In the unlikely event that your Kia has broken down, help is only a call away and trained staff will be dispatched to your location. If a repair cannot be conducted on the spot, the vehicle will be towed free of charge to the nearest Kia dealer.

8 Year High Voltage Drive
Battery Warranty
(or up to 160,000 kms)

All new Kia vehicles that are powered by a high-voltage drive battery come with a 8-year/160,000 km (whichever comes first) warranty that covers components found in the drive battery case. In the event that your vehicle becomes immobile due to a high voltage battery or system failure, we'll cover the cost of the tow to the nearest authorised Kia dealer.

Incident Care

If you and your new Kia were unfortunately involved in an incident or crash that requires body repairs to your Kia, Kia Incident Care is here to help you, and is free for the first five years.

Movement that inspires
